Question **1**

Correct

Mark 1.00 out of 1.00

What is the key characteristic of binary search?

a. It always starts from the beginning of the list
b. It works on unsorted lists
c. It can be applied only if the list is sorted ✓
d. It compares elements sequentially

Question **2**

Correct

Mark 1.00 out of 1.00

Which method of searching involves sequentially comparing each element until a match is found?

a. Hashing
b. Binary search
c. Jump search
d. Linear search ✓

Question **3**

Correct

Mark 1.00 out of 1.00

In which situation is linear search more efficient than binary search?

a. When the list is small and unsorted ✓
b. When the list is large and sorted
c. When the list is large and unsorted
d. When the list is small and sorted

Question **4**

Correct

Mark 1.00 out of 1.00

What is the time complexity of binary search in the worst case?

a. O(n log n)
b. O(log n) ✓
c. O🥱
d. O(1)

Question **5**

Correct

Mark 1.00 out of 1.00

Finding the location of a given item in a collection of items is called

a. Searching ✓
b. Finding
c. Mining
d. Discovering

Question **6**

Correct

Mark 1.00 out of 1.00

If the target element is greater than the middle element in binary search, where does the search continue?

a. In the middle of the list
b. In the right sublist ✓
c. At the beginning of the list
d. In the left sublist

Question **7**

Correct

Mark 1.00 out of 1.00

**_____sort is the simplest sorting algorithm that works by repeatedly swapping the adjacent elements in case they are unordered in n-1 passes.**

a. Bubble ✓

b. Complexity

c. Insertion

d. Selection

Question **8**

Correct

Mark 1.00 out of 1.00

The average case occurs in the linear search algorithm

a. When the item is not the array at all

b. When the item is somewhere in the middle of the array ✓

c. Item is the last element in the array or item is not there at all

d. When the item is the last element in the array

Question **9**

Correct

Mark 1.00 out of 1.00

Which of the following is a type of searching method?

a. Linear search ✓

b. Quick search

c. Merge search

d. Bubble search

Question **10**

Correct

Mark 1.00 out of 1.00

What is the time complexity of linear search in the worst case?

a. O(log n)
b. O(n log n)
c. O(1)
d. O👎 ✓

Question **11**

Correct

Mark 1.00 out of 1.00

Which of the following is a limitation of binary search?

a. It is slower than linear search for small lists
b. It requires the list to be sorted ✓
c. It can only be applied to large lists
d. It does not work with negative numbers

Question **12**

Correct

Mark 1.00 out of 1.00

In binary search, if the target element is less than the middle element, where does the search continue?

a. At the beginning of the list
b. In the right sublist
c. In the left sublist ✓
d. In the entire list

Question **13**

Correct

Mark 1.00 out of 1.00

In _____ checks the elements of a list, one at a time, without skipping any element.

a. Hash search
b. Binary search
c. Linear search ✓
d. Both (1) & (3)

Question **14**

Correct

Mark 1.00 out of 1.00

Which of the following statements about linear search is true?

a. Linear search requires the list to be sorted.
b. Linear search divides the list into halves.
c. Linear search can be applied to both sorted and unsorted lists. ✓
d. Linear search is more efficient than binary search on large lists.

Question **15**

Incorrect

Mark 0.00 out of 1.00

What happens in a binary search if the list has an even number of elements?

a. The search stops
b. The higher middle element is chosen as the middle element
c. The middle element is chosen randomly
d. The lower middle element is chosen as the middle element ✗
